Help us Understand Specific Learning Disabilities in Children in Canada and the United States!

Who Are We Looking For?
1. Parents/caregivers of children with Specific Learning Disability
2. Child age 5-18 years
3. Able to read and write English
4. Live in Canada or the United States

This survey will ask questions about how your child was diagnosed with a specific learning disability, and how the diagnosis was explained.

Our goal is to understand how children with learning disabilities are doing.

We also want to understand how parents/caregivers have been educated about their child’s learning disability.

We appreciate your help!

The University of Calgary Conjoint Faculties Research Ethics Board (CFREB) has approved this study (REB21-0961)
